IMPUTATION PROCEDURES

Records with missing or invalid data for number of students or FTE of teachers were processed as follows:

a. Missing_Data

1. First, an attempt was made to obtain the data from the SEA (the respondent).
2. If the SEA could not provide the data, the prior year's file was examined, and if the data were present, they were transferred to the current record.
3. If no prior year's record existed, the missing data were imputed from the LEA Non-Fiscal file (CCD Part III). The pupil/teacher ratio (PTR) of the controlling LEA was used to determine the number of students and/or FTE of teachers for the school record. A flag was set to denote that the data was imputed.

b. Invalid_Data

Records which obtained data that were invalid, e.g. very large number of students and a small number of teachers, were also called to the attention of the SEA. If no solution was provided by the SEA, these records had data values imputed from the Part III file using PTR's to replace the invalid values. Again, a flag was set to denote that the data was imputed.
